📁 Portfolio in LinkedIn 🌐 GitHub </> LeetCode

Summary

B.Tech (IT) student with a **8.02 CGPA**, skilled in **full-stack development** (Java, Spring Boot, React.js, Node.js) and **DBMS/System Design fundamentals**. Merged a production-grade architectural pattern into a **94k+** star open-source Java codebase and built full-stack platforms handling **real-time coordination** and **location-based discovery**. Solved **400+** **DSA problems** on LeetCode and ranked in **10+** **coding competitions**.

Experience

Open Source Contributor

Jun 2026 – Jul 2026

Java Design Patterns (iluwatar/java-design-patterns)

[Go To GitHub](#)

- Designed and merged the **Backends For Frontends (BFF)** architectural pattern module into a production Java codebase, implementing client-specific service gateways with **100% test coverage** across **14 classes**, resolving a design-pattern implementation issue open since **2015**.
- Diagnosed and resolved a Checkstyle/Spotless build-tool configuration conflict affecting **16+** **existing modules** repository-wide, and navigated a multi-round maintainer code review process to ship the change into master.

Projects

MeetSpot – Group-Based Local Activity Discovery Platform

Java, Spring Boot, MongoDB, React.js, Tailwind CSS

[Go To GitHub](#)

- Engineered a **full-stack, location-based platform** enabling users to discover nearby venues and form time-bound groups, implementing **JWT-based authentication** and group lifecycle management.
- Created a **trust-scoring system** to improve participation reliability and reduce no-shows across user groups.
- Built **map-driven discovery** using **OpenStreetMap (Overpass API)** and architected **scalable MongoDB schemas** supporting users, groups, and real-time coordination.
- Implemented **group chat (polling)**, attendance confirmation, **SOS alerts**, and private/public group management.

AutoJobs – Automated Job Discovery & Outreach Tool

React.js, Node.js, Express.js, SQLite, JSearch API

[Go To GitHub](#)

- Delivered a job-scraping tool that pulls listings via the **JSearch API** and generates specialized job descriptions matched to the user's profile.
- Implemented an HR **contact-discovery pipeline** with a personalized cold-DM generator to **automate job outreach**.
- Designed sleek frontend and enhanced load performance by **30%** by building a responsive React.js UI integrated with **10+ RESTful API endpoints**.

Technical Skills

Languages: Java, JavaScript, Python, C++

Core CS: Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, System Design Fundamentals

Web Development: HTML, CSS, React.js, Node.js, Express.js, Spring Boot, REST APIs

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman

Certifications

- | | |
|---|----------------------------------|
| SQL (Intermediate) – HackerRank (April 2025) | View Certificate |
| Data Structures & Algorithms – Infosys Springboard (May 2025) | View Certificate |
| Problem Solving Certificate – HackerRank (May 2025) | View Certificate |

Achievements

- 1st Position, Inter-Club Coding Competition (Oct 2024)
- 2nd Position, Hackathon organized by Blurock Ironic (Jan 2025)
- Solved **400+** **Data Structures and Algorithms problems** on LeetCode spanning arrays, strings, trees, graphs, and dynamic programming.
- Achieved top rankings in **10+ online and in-campus coding competitions** by applying optimal time and space complexity analysis under contest conditions.

Education

ABES Engineering College, AKTU

Oct 2023 – Jul 2027

Bachelor of Technology in Information Technology | CGPA: 8.02/10
